

Compatibility Testing Results

Prerequisites:

- A laptop
- Chrome browser with the latest version (131.0.6778.70) installed
- Mozilla Firefox browser with the latest version (132.0.2) installed
- Safari browser with the latest version (18.1.1) installed
- DevTools of Chrome browser
- Docker Desktop installed

Description: Compatibility Testing ensures that all primary functionalities of the WEare web app are tested across various browsers, including mobile platforms, using the Chrome browser's DevTools.

Results:

Bug Replication Across Browsers

All identified bugs in the WEare web app have been successfully replicated across multiple browsers.

Mobile Functionality Issues

The WEare web app exhibits critical functionality issues on mobile devices:

- **Login Issue:** Users are unable to log in as the **Sign In** button is not visible.
- **Navigation Menu Issue:** The **hamburger menu** located in the top-left corner is non-functional and cannot be expanded.
