	created by WSN-71 Test Execution WEare app Done
	created by WSN-127 [Profile Management] Verify changing ... Done
Sprint:	WSN Sprint 3

Description

Preconditions:

User is navigated to <http://localhost:8081/> and logged in.

Steps to reproduce:

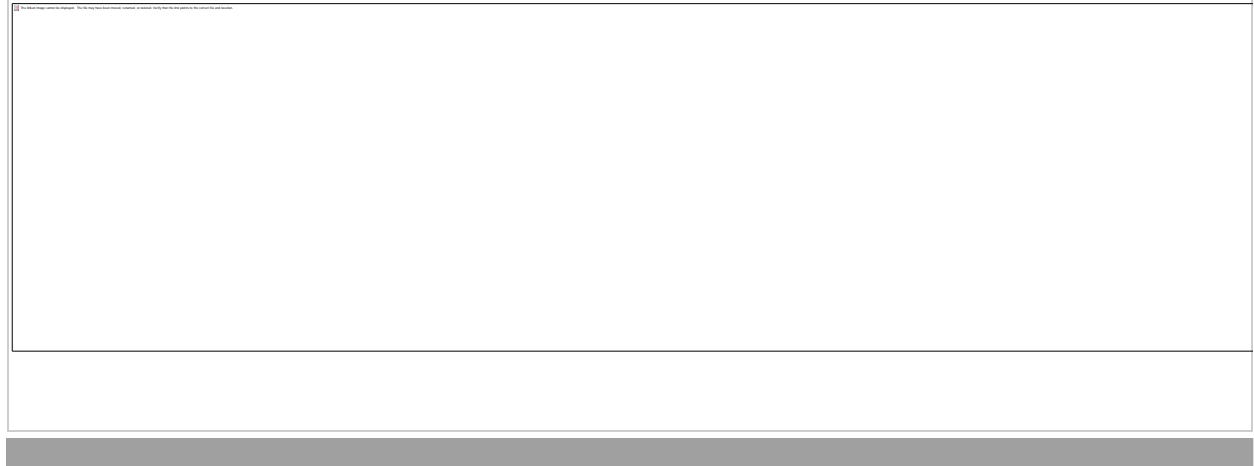

1. Click on the "Personal Profile" button
2. Click on the "edit Profile" button
3. Choose a country from the dropdown menu on the "Country" field

Expected result:

Dropdown menu with countries is shown

Actual result:

The country field is not clickable

[WSN-126] [Profile Management] Cannot change visibility of existing Profile Picture. Created: 21/Nov/24 Updated: 22/Nov/24 Resolved: 22/Nov/24

Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Thu Nov 21 06:24:34 GMT 2024

There was an unexpected error (type=Internal Server Error, status=500).

Validation failed for classes [com.community.weare.Models.User] during persist time for groups [javax.validation.groups.Default,] List of constraint violations: [ConstraintViolationImpl(interpolatedMessage="The username must have at least 2 symbols!", propertyPath=username, rootBeanClass=class com.community.weare.Models.User, messageTemplate="The username must have at least 2 symbols!")]]

	created by	WSN-71	Test Execution WEare app	Done
Sprint:	WSN Sprint 3			

Description

1. Navigate to the post “A new testing post for the WEare social network”

Expected result: Only relevant information is displayed for the user.

Actual result: There is a “Rank” along to each post created and probably it counts the created post by the user. However it is not relevant information for the user.

Severity: High

[WSN-52] [\[Posting and Interaction\] Newest Comments are not Visible Chronologically along the Post](#) Created: 07/Nov/24 Updated: 22/Nov/24 Resolved: 22/Nov/24

	Defect		
	created by	WSN-32 [Posting and Interaction] Set up How ...	Done
	created by	WSN-71 Test Execution WEare app	Done
Sprint:	WSN Sprint 3		

Description

1. Navigate to the post “A new testing post for the WEare social network”
1. Scroll down to the “Leave a comment” section
1. Type "1" in the message field
1. Click on the "Post Comment" button
1. Repeat Steps 3 and 4 to generate multiple comments under the post. On each comment type the next number, e.g. for the second comment submit a comment with content "2", for the third - "3" and so on until comment "102" is visible under the post.
1. Click on the "Show Comments" section under the post

Expected result: There should be an option how many of the newest comments should be visible under the post. Also as a user I expect to be able to filter the comments so that the newest will be visible on the top.

Actual result: There is no option for the user to set how many of the newest comments should be visible. Neither there is a filter for the comments so that the newest comments are on the bottom of the page and the user should scroll down to the comment "102".

Severity: Medium

[WSN-51] [\[Posting and Interaction\] User cannot Delete Mistakenly Attached File from a Post](#) Created: 07/Nov/24 Updated: 22/Nov/24 Resolved: 22/Nov/24

Status:	Done
Project:	WEare Social Network
Components:	None
Affects versions:	None
Fix versions:	None

	Defect			
	created by	WSN-26	[Posting and Interaction] Create a Po...	Done
Sprint:	created by	WSN-71	Test Execution WEare app	Done
	WSN Sprint 3			

Description

1. Click on the “New Post” button top left on the page
2. Select post visibility “Private” from the dropdown menu
3. Type “A new testing post for the WEare social network” in the message field.
4. Click on “Choose File” button
5. Select a picture “testing picture 1” (1,8MB)
6. Click on the “Upload” button
7. Try to delete it and upload a song instead

Expected result: User can delete a mistakenly attached file to the post and change it with another one.

Actual result: There is no option to delete the mistakenly attached file, so the user cannot save the post and continue.

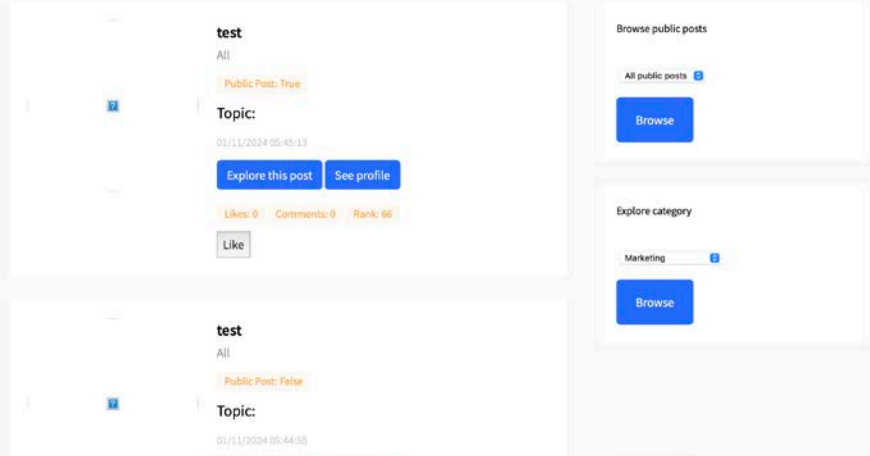

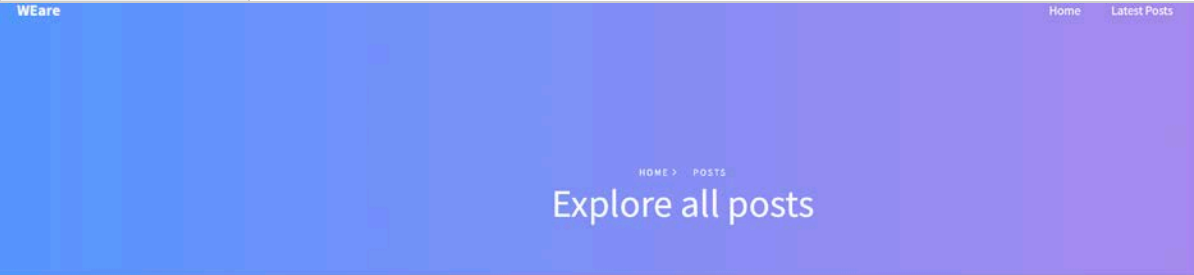

Severity: High

[WSN-50] [Posting and Interaction] User can create a Post without any content

Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Fri Nov 01 05:32:17 GMT 2024

There was an unexpected error (type=Internal Server Error, status=500).

Maximum upload size exceeded; nested exception is java.lang.IllegalStateException: org.apache.tomcat.util.http.fileupload.impl.FileSizeLimitExceededException: The field imagefile exceeds its maximum permitted size of 1048576 bytes.

Description

1. Click on the “New Post” button top left on the page
1. Select post visibility “Private” from the dropdown menu
1. Populate the message field with valid text.
1. Type “This is a testing post with a song uploaded.”

1. Click on “Choose File” button
1. Select a picture “audio-recording-test.m4a” (2,7MB)
1. Click on the “Upload” button
1. Click on the “Save Post” button

Expected result: The song is uploaded

Actual result: An error message that the file cannot be more than 1MB appears. It is not standantly designed and appears as a bug.

Severity: High
